PROJECTS

Maruti Suzuki Insurance (MI) - Insurance Management System, (Live Enterprise Application)

07/2025 – Present

Client: Maruti Suzuki India Ltd. A large-scale insurance management system for Maruti Suzuki vehicles, used to track policy lifecycle, expiries, renewals, and customer insurance data. The application is live, actively used by business users, and developed in close collaboration with Maruti business teams. Role: Frontend Developer (Angular) Duration: July 2025-Present Team Size: 20+ Developers (Frontend + Backend) Tech Stack:

- Frontend: Angular, TypeScript, RxJS, NgRx
- Backend: .NET
- UI: Angular Material / Custom UI (if used)
- APIs: REST APIs
- Tools: Git, JIRA, Postman
- Methodology: Agile / Scrum

Skill Sense

Developed a skill management and performance tracking platform to monitor employee growth and analytics. Built responsive UI using React.js and Material UI, with dynamic forms validated via React Hook Form and Yup. Created custom hooks for API calls and state management, and implemented reusable buttons and tables across the application. Designed interactive dashboards and graphs using Recharts, and built the application using microfrontend architecture for modularity and scalability Collaborated with backend developers and UI/UX designers to deliver a scalable, user-friendly, and maintainable web application.
